## ROTC Physical Assessment, the Army Physical Fitness Test and Required Height/Weight Information

**ROTC Physical Assessment** Scholarship Applicants are required to complete a Presidential Challenge Physical Fitness Test as part of the High School Application Process. The assessment consists of three events: Curl-ups, Push Ups, and 1 Mile Run. Upon completion this form needs to be sent to US Army Cadet Command G2 Incentive Division. FAX: 757-788-5781 or via email to train2lead@usacc.army.mil

<u>Push Ups:</u> The student lies face down on the mat in push-up position with hands under shoulders, fingers straight, and legs straight, parallel, and slightly apart, with the toes supporting the feet. The student straightens the arms, keeping the back and knees straight, then lowers the body until there is a 90-degree angle at the elbows, with the upper arms parallel to the floor. A partner holds her / his hand at the point of the 90-degree angle so that the student being tested goes down only until her / his shoulder touches the partner's hand, then back up. To start, a timer calls out the signal "Ready? Go!" and begins timing student for one minute. The student stops on the word "stop."

Record number of correct Push Ups.

<u>Curl Ups:</u> Instructions: Have student lie on cushioned, clean surface with knees flexed and feet about 12 inches from buttocks. Partner holds feet. Arms are crossed with hands placed on opposite shoulders and elbows held close to chest. Keeping this arm position, student raises the trunk curling up to touch elbows to thighs and then lowers the back to the floor so that the scapulas (shoulder blades) touch the floor, for one curl-up. To start, a timer calls out the signal "Ready? Go!" and begins timing student for one minute. The student stops on the word "stop." Record number of correct Curl Ups.

<u>One-Mile Run:</u> Instructions: On a safe, one-mile distance, students begin running on the count "Ready? Go!" Walking may be interspersed with running. However, the students should be encouraged to cover the distance in as short a time as possible. Times are recorded in minutes and seconds.

## ARMY PHYSICAL FITNESS TEST (APFT)

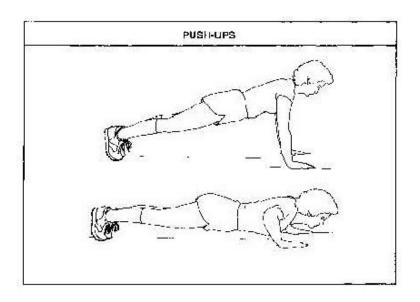

If you win a scholarship when you enroll in school you will be administered the APFT prior to contracting. APFT events are push-ups, sit-ups, and the 2-mile run. By 15 December 2009 (all 4-year) or by 15 December of the sophomore year (all 3-year

advance designees) you must attain at least 50 points in each event, with a minimum of 150 points. FAILURE TO ATTAIN THE MINIMUM SCORE WILL RESULT IN FORFEITURE OF THE SCHOLARSHIP. A male between 17 and 21 years old should arrive at college able to do 42 push-ups; a female 19 push-ups. A male needs to be able to do 53 sit-ups and a female 53 sit-ups. A good time for the two-mile run for a male would be 15:54 minutes and for a female 18:54 minutes. Good physical conditioning is critical and prior physical conditioning and muscle toning are essential. See enclosure 2 for information on the APFT. You will also be required to meet height/weight standards. Information on height/weight follows the information on taking the APFT.

## INFORMATION ON TAKING THE APFT

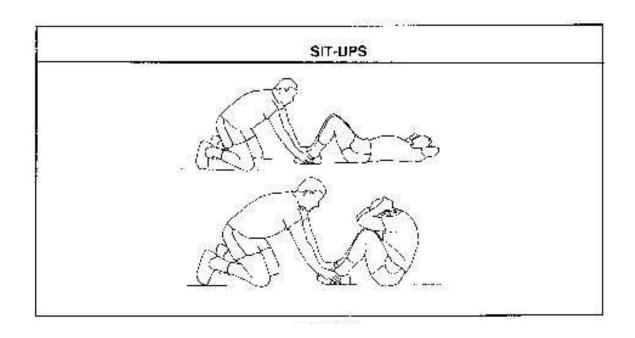

PUSH-UPS. The push-up event measures the endurance of the chest, shoulder, and triceps muscles. On the command 'get set', assume the front leaning rest position by placing your hands where they are comfortable for you. Your feet may be together or up to 12 inches apart. When viewed from the side, your body should form a generally straight line from your shoulders to your ankles. On the command 'go', begin the push-up by bending your elbows and lowering your entire body as a single unit until your upper arms are at least parallel to the ground. Then return to the starting position by raising your entire body until your arms are fully extended. Your body must remain rigid in a generally straight line and move as a unit while performing each repetition. At the end of each repetition, you will be told the number of repetitions you have correctly completed. If you fail to keep your body generally straight, to lower your whole body until your upper arms are at least parallel to the ground, or to extend your arms completely, that repetition will not count.

If you fail to perform the first ten push-ups correctly, the mistakes will be explained and you will be retested. After the first 10 push-ups have been performed and counted, no restarts are allowed. The test will continue, and any incorrectly performed push-ups will not be counted. An altered, front leaning rest position is the only authorized rest position. That is, you may sag in the middle or flex your back. When flexing your back, you may bend your knees, but not to such an extent that you are supporting most of your body weight with your legs. If this occurs, your performance will be terminated. You must return to, and pause in, the correct starting position before continuing. If you rest on the ground or raise either hand or foot from the ground, your performance will be terminated. You may reposition your hands and/or feet during the event as long as they remain in contact with the ground at all times. Correct performance is important. You will have two minutes in which to do as many push-ups as you can.

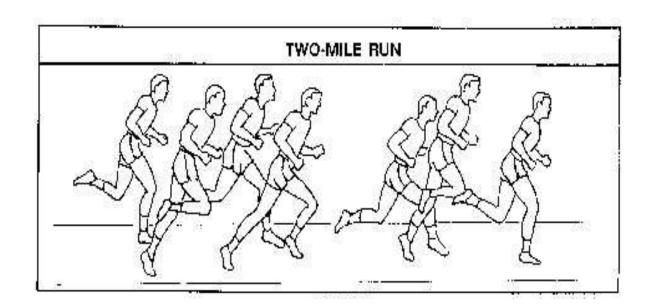

SIT-UPS. The sit-up event measures the endurance of the abdominal and hip flexor muscles. On the command 'get set', assume the starting position by lying on your back with your knees bent at a 90 degree angle. Your feet may be together or up to 1 inch apart. Another person will hold your ankles with the hands only. No other method or bracing or holding the feet is authorized. The heel is the only part of your foot that must stay in contact with the ground. Your fingers must be interlocked behind your head and backs of your hands must touch the ground. On the command 'go', begin raising your upper body forward to, or beyond, the vertical position. The vertical position means that the base of your neck is above the base of your spine. After you have reached or surpassed the vertical position, lower your body until the bottom of your shoulder blades touch the ground. Your head, hands, arms, or elbows

do not have to touch the ground. At the end of each repetition, you will be told the number of repetitions you have correctly completed. A repetition will not count if you fail to reach the vertical position, fail to keep your fingers interlocked behind your head, arch or bow your back and raise your buttocks off the ground to raise your upper body, or let your knees exceed a 90 degree angle. The up position is the only authorized rest position. If you stop and rest in the down (starting) position, the event will be terminated. As long as you make a continuous physical effort to sit up, the event will not be terminated. You may not use your hands or any other means to pull or push yourself up to the up (resting) position or to hold yourself in the rest position. If you do so, your performance in the event will be terminated. You will have two minutes to perform as many sit-ups as you can.

TWO MILE RUN. The two mile run is used to assess your aerobic fitness and your leg muscles endurance. You must complete the run without any physical help. Each cadet will be given a number for your chest for identification You must make sure the number is visible at all times. At the start, you will line up behind the starting line. On the command 'go', the clock will start. You will begin running at your own pace. You are being tested on your ability to complete the 2-mile course in the shortest time possible. Although walking is authorized, it is strongly

helped in any way or leave the designated running course for any reason, you will be disqualified. It is legal to be paced during the 2-mile run, as long as there is no physical contact with the paced cadet and it does not physically hinder other cadets taking the test. The practice of running ahead of, along side of, or behind the tested cadet, while serving as a pacer is permitted. Cheering or calling out elapsed times is also permitted. Turn in your number when you finish the run. Then, go to the area designated for the cool down and stretch. Do not stay near the finish line as this may discouraged. If you are physically interfere with the testing.
